Shermco Industries expands switchgear and electrical equipment inventory in the Gulf Coast

DALLAS – Shermco Industries has expanded its switchgear and electrical equipment offerings in the Gulf Coast, adding hard-to-find and obsolete equipment. The items are available for purchase.

“When a company has a substation or switchgear lineup that fails or is damaged by a natural disaster, a consultant will many times tell them to replace the entire assembly,” said Ron Widup, president of Shermco Industries. “Companies can save a lot of time and money by replacing only the defective parts rather than the entire lineup. For this reason, Shermco has amassed a large inventory of these hard-to-find and obsolete parts available for purchase.”

Shermco Industries, a leader in electric disaster recovery repair operations, does a large amount of work in the recovery and recommissioning of electrical infrastructure when disaster strikes.

“Many times a number of refurbished items can be quickly implemented, saving a company tens of thousands of dollars. This alone is a huge savings over procurement of new, not to mention circumventing the costs associated with the downtime involved in ordering, receiving, and installing a new substation or switchgear lineup,” said Widup.

ABOUT SHERMCO

[Shermco Industries](http://www.shermco.com) is a provider of safe, reliable testing, repair, professional training, electrical outage planning, maintenance and analysis of rotating apparatus and electrical power distribution systems and related equipment for the light, medium, and heavy industrial base nationwide. Founded in 1974 in Dallas, the company is comprised of two strategic business units; the Machine Services Division and the Engineering Services Division. With a corporate location in Irving, Texas, a sales office in Brussels and service centers in Austin, Cedar Rapids, Des Moines, Houston, Sweetwater, and Tulsa, Shermco Industries has over 385 full-time employees. The company is a member in good standing with the Electrical Apparatus Service Association, American Wind Energy Association, Professional Electrical Apparatus Recyclers League, and the InterNational Electrical Testing Association.
