### **Shermco Industries enters exclusive agreement with FLIR**

DALLAS – Shermco Industries has entered into an exclusive agreement to sell FLIR® Infrared Windows. The windows are a safety solution installed on electrical cabinets to safeguard electrical workers from the risk of hazardous arc flash incidents.

“Opening an electrical cabinet to perform IR and visual inspections of live components is extremely dangerous work, exposing an electrical worker to the risk of hazardous arc flash injuries and even death,” said Mike Moore, Shermco vice president. “Performing these inspections wearing the proper protective equipment is a painstaking, time-consuming process, requiring at least two qualified personnel. These FLIR IR windows eliminate the danger, the PPE hassle and the need for extra qualified workers.”

FLIR IR Windows install quickly and securely using the same design as common conduit connections. They are broadband crystal IR windows in which the lens is encased in rugged, anodized aluminum frame allowing for indoor and outdoor scans.

“We are proud to offer this product to our clients,” said Moore. “It provides the safety and efficiencies every industrial company needs.”

For more information, contact Shermco Industries at 972-793-5523.

#### **ABOUT SHERMCO**

Shermco Industries is a provider of safe, reliable testing, repair, professional training, maintenance and analysis of rotating apparatus and electrical power distribution systems and related equipment for the light, medium, and heavy industrial base nationwide. Founded in 1974 in Dallas, the company is comprised of two strategic business units; the Machine Services Division and the Engineering Services Division. With a corporate location in Irving, Texas, a sales office in Brussels and service centers in Austin, Cedar Rapids, Des Moines, Houston, Sweetwater, and Tulsa, Shermco Industries has over 440 full-time employees. The company is a member in good standing with the Electrical Apparatus Service Association, American Wind Energy Association, Professional Electrical Apparatus Recyclers League, and the InterNational Electrical Testing Association.
