Shermco Industries expands into San Antonio

Fast-growing electrical services company opens eight offices in six years

SAN ANTONIO – Shermco Industries continued its expansion this month by opening a new office in San Antonio. Located at 12000 Network Blvd., building D # 410, the office is both a sales and production facility, approximately 6,600 square feet.

Kevin Ewing, the Shermco regional manager that oversees the Austin and San Antonio offices, says the company opened in San Antonio due to the growth in that market.

“We are happy to be here and have already secured quite a bit of work,” said Ewing. “This area is great for us due to all the data center business. We have six engineering field service technicians here and are currently looking for two more.”

Ewing also mentioned that due to the company’s expansion mode, many of the Shermco offices have positions available in the electrical services industry.

“Right now we are looking to fill 54 positions corporate-wide,” said Ron Widup, Shermco president. “In Dallas, we recently took more square footage on Airport Freeway to accommodate our engineering department. And, we are very excited to now be open for business in San Antonio as we expand our suite of Shermco electrical services throughout North America.”

For more information, contact Shermco Industries at 972-793-5523.

ABOUT SHERMCO

Shermco Industries is a provider of safe, reliable testing, repair, professional training, maintenance and analysis of rotating apparatus and electrical power distribution systems and related equipment for the light, medium, and heavy industrial base nationwide. Founded in 1974 in Dallas, the company is comprised of two strategic business units; the Machine Services Division and the Engineering Services Division. With a corporate location in Irving, Texas, a sales office in Brussels and service centers in Austin, Cedar Rapids, Des Moines, Houston, San Antonio, Sweetwater, and Tulsa, Shermco Industries has over 440 full-time employees. The company is a member in good standing with the Electrical Apparatus Service Association, American Wind Energy Association, Professional Electrical Apparatus Recyclers League, and the InterNational Electrical Testing Association.
