Gulf Coast companies turn out for 2012 SIMS Conference

Industrial professionals from Houston and surrounding areas received intensive training and continuing education credits

HOUSTON – The Shermco Industries Motors and Switchgear (SIMS) Conference was held in League City, Texas on September 5th. The conference provided two days of intensive training for professionals from Houston and the surrounding Gulf coast region.

A leader in electrical maintenance, repair and safety training, Shermco provided two educational tracks related to electrical power infrastructure, Motors & Switchgear and Power & Safety, with five presentations in each. The concentrated event provided attendees the knowledge and resources to quickly identify better and faster on-the-job solutions to many of the challenges faced by industry, as well as the opportunity to earn valuable continuing education credits.

“We had a great turnout and everyone came away from the event with a ton of directly applicable and new working knowledge of electrical power systems and safety-related items,” said Tim Strickland, Houston sales manager.

ABOUT SHERMCO

Shermco Industries is a provider of safe, reliable testing, repair, professional training, maintenance and analysis of rotating apparatus and electrical power distribution systems and related equipment for the light, medium, and heavy industrial base nationwide. Founded in 1974 in Dallas, the company is comprised of two strategic business units; the Machine Services Division and the Engineering Services Division. With a corporate location in Irving, Texas, a sales office in Brussels and service centers in Austin, Cedar Rapids, Des Moines, Houston, San Antonio, Sweetwater, and Tulsa, Shermco Industries has over 440 full-time employees. The company is a member in good standing with the Electrical Apparatus Service Association, American Wind Energy Association, Professional Electrical Apparatus Recyclers League, and the InterNational Electrical Testing Association.
