Don Gibson becomes Director of Sales for Shermco Industries Renewable Energy Services

Irving, TX: Shermco Industries, North America’s largest independent electrical testing, maintenance and engineering company, has announced that Don Gibson has been engaged as the director of sales for Shermco’s services and products for the renewable energy market. Gibson comes from a major wind energy utility where he was the business development manager after serving as a regional site operations manager overseeing five windfarms and he brings that depth of experience to help grow Shermco’s specialty services into the wind energy market. Gibson also previously served as the operations planning manager for a major wind turbine manufacturer.

Gibson has a bachelor of arts in communication from Grace College, Winona Lake, Indiana and a MBA from Anderson University. He will be based out of Indianapolis and will help focus Shermco’s sales efforts in the Midwest as well as their more established service locations in the Southwest.

“We have known Don for many years as a wind industry leader and we are very pleased to have him join Shermco and lead our expanded sales efforts into the industry,” said Paul Idziak, vice-president of Shermco’s Machine Services Division.

“I am looking forward to supporting Don as we expand our wind energy field services and generator remanufacturing capabilities into new geographic areas,” said Steve Camber, senior vice-president of sales.
